

The Sollatek SolarStar

Portable solar mobile charger

The **Sollatek SolarStar** is a revolutionary solar mobile phone charger for people on the move.

Today's traveller needs the confidence of knowing that they're always in contact with the rest of the world, even when their mobile phone is out of charge and there's no mains electricity supply nearby. Smart, compact and eco-friendly, SolarStar means you can make that all-important call anytime, any place – even in remote areas where you can't plug in.

SolarStar can charge your mobile phone, MP3 player, digital camera and radio. It has a built in LED torch invaluable in the hunt for those lost keys, to

locate keyholes, or to set your alarm clock and light your way in darkness.

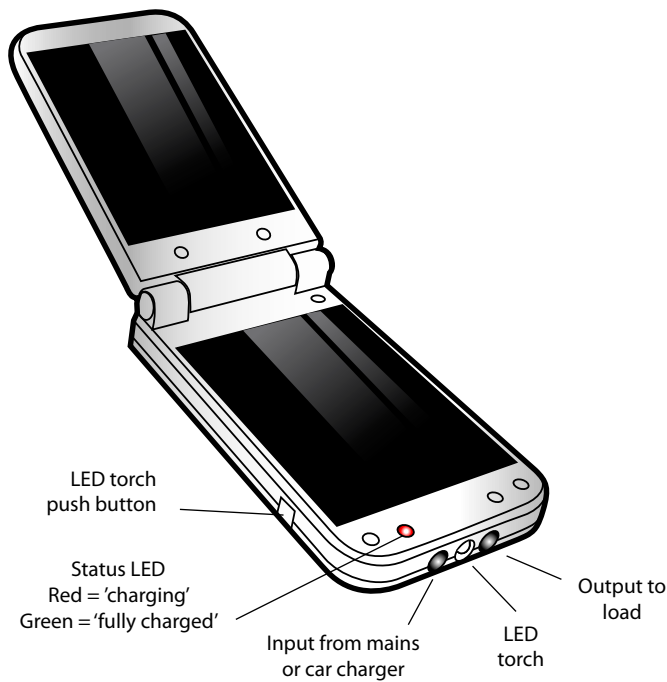

Charged by sunlight, your car or the mains, the SolarStar set includes mobile phone adaptors and is compatible with major mobile phone brands. A car charger, mains charger and a universal lead, make it truly versatile.

Simple and easy to use, when the flap is open SolarStar will charge automatically using the sun's energy. A red LED will indicate when a device is charging, the green LED will confirm that the charge is complete. So, on business or vacation, make sure you don't leave home without SolarStar.
