VOLTAGE PROTECTION

VOLTRIGHT SVS20-22WM

ኛ Voltright

SVS20-22WM (WALL MOUNT)

VOLTAGE PROTECTION AND STABILISATION FOR ALL ELECTRICAL AND ELECTRONIC EQUIPMENT

Description

As both high and low mains voltage can damage your electrical equipment, the Sollatek SVS is designed to monitor and correct the incoming supply continuously.

If the voltage rises or drops, the SVS will stabilise the output to ensure that the voltage reaching your equipment remains constant at 230V (+6%) or 110V (+6%) for US voltage systems, within the operating range of the unit. See table in the next page.

The Sollatek SVS has a modern state of the art 7 LED display to indicate accurately the state of the input at all times and 5 LED s to indicate the output voltage supplied to your load.

Applications

The SVS also protects your electrical equipment against power spikes and surges. Using the SVS ensures a stable, and clean voltage supply to your equipment.

The SVS20 is suitable for all electrical and electronic appliances, including: air conditioners, computers, fridges, TV, satellite, and any electrical appliance rated up to 20A.

Features

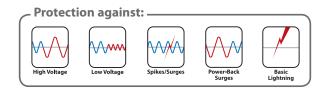

- Microprocessor controlled stabiliser
- Very wide input voltage range
- Excellent output voltage stability (+/-6%)
- Includes surge and spike suppression
- Extremely fast response
- Incorporates over-voltage & under voltage disconnect (AVS function)
- 10 second start-up delay as standard (modifiable)
- Incorporates TIMESAVE[™] Function.
- British design

- Features: .

SVS20-22WM (Wall Mount, metal casing)

- Protection for:
