

PROVIDING CLEAN RELIABLE POWER WORLDWIDE

A range of power protection products that enable appliances to operate efficiently, wherever you are in the world.

TV / MULTIMEDIA

THE THREAT

Lightning and high voltages are the main threats to these appliances.

THE SOLUTION

TVGUARD

The Voltshield TVGuard is specifically developed to protect these appliances from high voltages, with added spike and surge protection.

Also consider:

VOLTGUARD

The VoltGuard combines the protection of the FridgeGuard and HivoltGuard by disconnecting the power when it goes below or above un-acceptable level.

SMALL AVR-SINGLE PHASE

The Sollatek single phase AVRs are suitable for all applications.

FRIDGES / FREEZERS

THE THREAT

Brown outs and low voltage can seriously damage the compressor.

THE SOLUTION

FRIDGEGUARD

The Voltshield FridgeGuard monitors the voltage and disconnects when the power is low. It also provides a delay on startup, preventing frequent stops and starts that can be harmful.

Also consider:

SVS

In areas where mains power is low, the SVS will correct the voltage ensuring that your fridge operates normally and cools efficiently.

AVS15

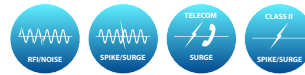

The Voltshield AVS15 protects against over voltage, under voltage, power-back surges and spike/surge protection. (rated at 15 Amps).

WASHING MACHINES / DISHWASHERS

THE THREAT

Lightning, spikes and surges are serious threats to data and communication equipment. When spikes and surges enter the phone and data lines, they can cause extensive damage to hardware and data.

THE SOLUTION

VOLTGUARD

The Voltshield VoltGuard combines the protection of the FridgeGuard and HivoltGuard by disconnecting the power when it goes below or above un-acceptable level.

Also consider:

SVS

In areas where mains power is low, the SVS will correct the voltage ensuring that your appliances operate normally and efficiently.

AVS13

The Voltshield AVS13 protects against over voltage, under voltage, power-back surges and spike/surge protection. (rated at 13 Amps).

TELEPHONES / ROUTERS

THE THREAT

These equipment's sensitive electronics can be damaged by high voltage and surges and their motorised mechanism by brownouts and low voltage.

THE SOLUTION

HIVOLTGUARD

The Voltshield HivoltGuard protects your equipment by disconnecting the power when it goes above un-acceptable level. Additionally, there is a delay when power returns to normal.

Also consider:

AVS13RL

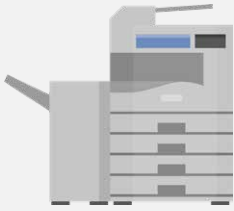

The Voltshield AVS13RL safeguards and protects by disconnecting the power when its bad and reconnecting automatically on return of normal power.

MULTIGUARD MG

The Voltsafe MultiGuard is a high quality 4-way strip that provides full surge/spike protection at an affordable price and is available in different models.

PRINTERS / SCANNERS

THE THREAT

High and low voltage can both damage the appliances' motors and their sensitive electronic circuitry.

THE SOLUTION

HIVOLTGUARD

The Voltshield HivoltGuard protects your equipment by disconnecting the power when it goes above un-acceptable level. Additionally, there is a delay when power returns to normal.

Also consider:

SVS

The Voltright SVS provides stable power especially in areas of extensive brown outs and low voltage. With added spike and surge protection.

ULTIMA UPS

The Voltsure Ultima UPS is ideally suited to provide backup power for the safe operation and preventing of paper jams in case of power cuts.

AIR CONDITIONER / SPLIT UNITS

THE THREAT

Similar to fridges, A/C units are very susceptible to brown outs and low voltages. Disconnecting when the power is low ensures protection.

THE SOLUTION

A/C GUARD

The Voltshield A/C Guard protects your A/C units from high and low voltage, by disconnecting from the mains, and reconnecting again when the mains return within acceptable limits.

Also consider:

SVS

If the mains continue to be low for prolonged periods, use the SVS to protect the compressor against brown outs and help it work efficiently and cool properly.

AVS30

Use the VoltShield AVS30 to protect A/C units up to 30 Amps.

NOTEBOOKS / LAPTOPS

THE THREAT

High voltage will damage your laptop or notebook whilst connected to the mains.

THE SOLUTION

NOTEBOOKGUARD

The Voltshield NotebookGuard will disconnect your laptop and protect it from high voltage and surges, and reconnect when power returns to acceptable limits.

Also consider:

HIVOLTGUARD

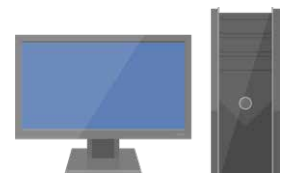

The Voltshield HivoltGuard will disconnect the power and isolate your notebook from damaging voltages. As the notebook has a built-in battery, it will continue to operate.

VOLTGUARD

The Voltshield VoltGuard combines the protection of the FridgeGuard and HivoltGuard by disconnecting the power when it goes below or above un-acceptable level.

COMPUTERS / SERVERS

THE THREAT

Surges and over-voltage are damaging to computers. Power cuts can damage equipment as well as result in the loss of your critical data.

THE SOLUTION

ULTIMA UPS

The Voltsure Ultima UPS is the product of choice to provide power protection and up to 1 hour backup for your computer in these situations.

Also consider:

MULTIGUARD MG

The Voltsafe MultiGuard is a high quality 4-way strip that provides full surge/spike protection at an affordable price and is available in different models.

MAXIMA UPS

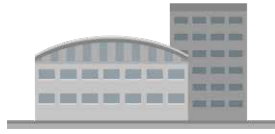

The Voltsure Maxima UPS is a double conversion UPS that provides clean, high level quality power to fully protect mission-critical devices.

HOME

WHOLE OFFICE

THE THREAT

Power cuts are not only inconvenient but can damage equipment as well. High and low voltage, spikes/surges and power back surges can damage your home appliances.

THE SOLUTION

AVR

The AVR will rapidly detect voltage variations and correct the output, Suitable for all applications for domestic use. Single and three phase models available.

Also consider::

ULTIMA UPS

Complete protection from voltage fluctuations and back-up power in case of power cuts for all your home appliances.

AVS30

Rated at the full 30Amps and can protect all equipment against fluctuations and surges. Three phase models available.

THE THREAT

High and low voltage, spikes/surges, power-back surges and lightning can damage all your home and office equipment.

THE SOLUTION

AVR

The Voltright AVR will protect the whole installation with a single or three phase Sollatek Automatic Voltage Regulator. Use other options like the AVS30 and DSP to provide total power control and protection.

Also consider:

AVS30

Rated at the full 30Amps and can protect all equipment against fluctuations and surges. Three phase models available.

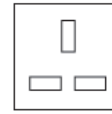

DSP1P-0 & DSP3P-0

Available in both single and three phase versions and provides comprehensive (Class II) lightning protection of up to 20 kA.

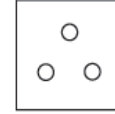

SOCKET AVAILABILITY

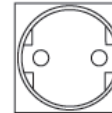

All our featured products can be ordered with most of the following sockets:

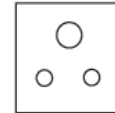

UK 13amp

UK 15amp

European (Euro)

Indian R6

For more detailed information please refer to our Voltage Protection Catalogue, or visit www.sollatek.com.
